Profile

Computer Science graduate from AAST with experience in cash management at Henkel Egypt and hands-on experience in software development and ERP systems. Strong problem-solving skills, adaptability, and eagerness to learn and grow professionally.

Education

Bachelor's Degree at Arab Academy for Science, Technology and Maritime Transport (AAST), Aswan , Egypt **October 2022 - June 2026**

Grade: 2.5

Experience

Cash Custodian at Henkel, Aswan , Egypt **September 2025 - June 2026**

- Managed daily cash receipts, collected and verified invoices, and recorded expenses, maintaining accurate financial records.

Internships

Embedded Systems Diploma at Information Technology Institute (ITI) **August 2023 - September 2023**

Completed 162 hours of Embedded Systems AVR training at ITI, covering C programming, AVR interfacing, RTOS, and software testing. Developed and submitted a Temperature Control System as a final project.

Skills

Programming Languages: C, C++

Web Development: React.js, Vue.js, HTML5, CSS3, Node.js, REST APIs

ERP & Databases: ERPNext, Frappe Framework, MySQL, MariaDB, Database Management

Tools & Technologies: Git, Linux, GitHub, AWS

Professional Skills: Problem Solving, Attention to Detail, Adaptability, Teamwork

Projects

Supermarket ERP System

Developed a supermarket management system integrating core business operations, including point of sale (POS), inventory management, purchasing, and accounting. Built a React-based frontend integrated with an ERPNext/Frappe backend, with support for Arabic and English interfaces and right-to-left (RTL) layouts. Worked on business workflows, stock consistency, and accounting-related functionality.

Password Manager Web Application • GitHub

Secure password management web application using React.js, Node.js, Express.js, and MongoDB. Implemented JWT authentication, password hashing, personal password vault management, and secure CRUD operations, with features including password visibility controls, clipboard copying, and trash recovery.

Smart Aircraft Parking Guidance System • GitHub

Designed and implemented a hardware prototype simulating an aircraft parking guidance system using an Arduino Uno, ultrasonic distance sensing, LCD feedback, LEDs, and audio alerts. Implemented distance-based guidance logic and an interrupt-triggered emergency stop mechanism.

Languages

Arabic - Native

English - Conversational
